SKILLS

PROGRAMMING

Experienced
TypeScript, React, Next.js SvelteKit, PostgreSQL .NET, TailwindCSS, Drizzle, HTML, CSS

Intermediate
Python, C++ C, Docker, Redis, Nginx

Familiar
Rust, Solana, Unreal Engine, MySQL

KEY COURSEWORK

Data Structures & Algorithms Operating Systems Database Management Systems Compiler Design Software Engineering Computational Statistics

EXPERIENCE

Fullstack AI Engineer - *Presidio* *Mar 2026 – Present*

- Modernized agent harness by migrating from HAI framework to LangChain's `createAgent`, enabling parallel tool execution, faster feature delivery, better context summarization, and improved recovery from chat failures.
- Added Team Workspaces, expanding the platform from personal workspaces to collaborative team usage.

Associate Fullstack AI Engineer - *Presidio* *Sep 2025 – Mar 2026*

- Built a dynamic prompt-caching layer in an internal AI framework, reducing inference costs by 40%.
- Implemented chat virtualization with TanStack Virtualizer

PROJECTS

Open Source Contributions

- Prometheus (`prom-client`) PR #742: Optimized metric scraping by analyzing cross-library memory tracking patterns; replaced resource-heavy API calls with a lightweight, RSS-specific internal Node.js API.
- CCExtractor PR #1517: Patched a UTF-8 multibyte parsing vulnerability in the WebVTT subtitle module.
- DiceDB JS Client GitHub: Wrote an async JavaScript client for a reactive, Redis-inspired DB.

Web native Note Editor `In Progress`
A web-based notes editor built with CodeMirror v6, focused on Obsidian-like live preview and cleaner default writing behavior.

Homelab Infrastructure
Repurposed old hardware into a self-hosted node running Immich; configured Tailscale tunnels and Cloudflare proxies to bypass carrier-grade NAT (CGNAT).

ACHIEVEMENTS

- Received the **Spot Award** for key technical contributions to HAI Framework, an internal agentic AI framework, within the first quarter of joining the team.
- **1st Place**, Daksh Hackathon - built an NFT bartering platform.
- **Ranked 2nd Globally**, LeetCode JavaScript Weekly Challenge.
- Solved **250+** problems on LeetCode.
- Secured **10.0 GPA** in all technical laboratory courses.

LEADERSHIP

- **Executive Coordinator**, Web Cluster - Tech E, SASTRA TBI & E-Cell; helped manage web initiatives and student-led technical activities.
- **NSS Member**, coordinated student activities and supported regional social outreach initiatives.
